

SUCCESS STORY

MANAGE YOUR BUSINESS BETTER WITH CABBAGE

Cabbage enhances Sage 300 Construction Software (Timberline). For construction accountants and project managers, Cabbage streamlines the process of tracking the financial health and profitability of projects.

THE CLIENT

OWI Contractors, LLC is a privately held, CT State certified "Woman Owned Small/Minority Business Enterprise," providing general contracting services in the state of Connecticut.

OWI Contractors has been a union general contractor for over 20 years, and has performed a wide variety of construction projects.

Past and present work includes: retail stores, office buildings, educational buildings, highway service plazas and marine construction.

MISSION:
Construction General Contractor

LOCATION:
Stratford, CT

Cheshire, CT 06410

CHALLENGE

For OWI, the process of verifying project profitability was haphazard at best. They needed to use several reports in order to complete a project estimate, which made the confirmation of values confusing. Because of this, many times the task of review was ignored.

BACKGROUND

An inability to make cost changes directly to projects led to a lengthy and overwhelming process of verifying changes. OWI needed changes to be made **directly** to the report that would automatically update the project values. They wanted a way to condense all needed information into an easy-to-use format that would create an accurate WIP Schedule.

"We needed the ability to make changes to estimates while maintaining the integrity of the original estimate."

SOLUTION

OWI WITH CABBAGE'S HELP

OWI Contractors doesn't have to wait for verification at multiple stages in order to move forward on a project estimate anymore. Cabbage enables real-time data manipulation for the cost to complete the process and then will create an accurate WIP Schedule. Streamlining this monthly process has saved several days of work!

- All the information needed to track projects is located on the **CIP view**
- Changes made are **instantly updated** for review
- Cabbage **eliminates the lengthy process** of verifying changes from running cost reports multiple times
- It **can drill down** on subcontracts and actual costs to verify values
- This can be performed by the project manager in **real time**

"Cabbage streamlined the weekly and monthly tracking of project profitability, which saved us 43% in administrative time."
